MASTERS OF PREVENTIVE VETERINARY MEDICINE (MPVM) FOR THE US ARMY

The MPVM degree program is a 1-2 year graduate professional degree for veterinarians and other medical professionals interested in the One Health approach to animal, human and environmental health.

As you desire, explore: Animal research • Cattle and range management • Community development • Discovery • Economics and management • Ecosystem health • Emergency preparedness and response • Epidemiology • Food safety • Global health • Government agencies • Herd health • International agriculture and development • Laboratory animal medicine and management • Leadership • Livestock and production • One health • Planetary health • Health policy • Public health • Regulatory medicine • Research • Shelter medicine • Small ruminant management • Teaching • Vaccines, pharmaceuticals and biotechnology • Wildlife health and management • Zoonotic and vector-borne disease

During a 2-3 year LTHET training, you will take core courses in epidemiology and One Health; perform an applied research project of your choice; and prepare for board certification in the ACVPM. Your optional Year 3 Operational Track could have courses in food safety, teaching, International Ag Development, language, or any classes UCD offers. We customize to meet your interests, including the potential to earn a second master’s degree. Nestled in a small northern California city near the farm-to-fork capital of Sacramento, and between San Francisco and Lake Tahoe, Davis is bike and kid-friendly, has great restaurants, nearby outdoors activities and fabulous weather.

NEW CURRICULUM
The modernized MPVM curriculum has core courses in epidemiology, biostatistics, study design, research methods, leadership, ecosystem health, and infectious disease epidemiology. Elective options allow students to explore zoonotic disease, food safety, diagnostic test evaluation, spatial analysis, mathematical modeling, disease ecology, and many more courses from across UC Davis. Additionally, students will write a thesis on research they undertake during the course of the program.

GRADUATE SUCCESS
Since 1967, this pioneering program’s more than 900 graduates have excelled worldwide in leadership, academic, and research positions with universities, private industry, international agencies, non-governmental organizations, and governments.

Application priority deadline January 15, 2019 (open until June 1)
